

City of Birmingham POLLING LOCATIONS

Bound District maps developed during the 2020 reapportionment are based on Census 2020 block data. Census block data does not perfectly match the corporate limits of the City as maintained on the City's GIS mapping system. The district lines presented in the City's GIS mapping system have been adjusted to the general and planimetric data maintained by the Department of Planning, Engineering and Permits, and internal boundaries are adjusted to center line of streets and other definable boundaries. Copies of the original census-block based maps are available in the Office of the City Clerk.
